

Human Evaluation Protocol

Dimension	ID	Verification Item	Score (1–5)
Relevance	R1	The summary covers the main discussion topics and key events described in the topic-level summaries.	
Consistency	C1	Participant roles, actions, and viewpoints are correctly attributed according to the participant-specific summaries.	
	C2	The summary does not contain hallucinated facts, unsupported claims, or information absent from the provided inputs.	
	C3	The emotional developments described in the summary are consistent with the emotion information in the topic-level summaries.	
	C4	The emotional developments described in the summary are consistent with the emotion information in the participant-specific summaries.	
Coherence	H1	The summary integrates information across topic segments into a coherent narrative rather than listing them independently.	
	H2	The summary integrates information across participants into a coherent narrative rather than listing them independently.	
Fluency	F1	The summary is fluent and logically consistent, without major readability or grammatical issues.	
Overall Quality Score			

Scoring Rubric (1–5 Likert Scale)

- **5 – Excellent:** The criterion is fully satisfied with no noticeable issues.
- **4 – Good:** The criterion is mostly satisfied, with only minor issues that do not substantially affect overall quality.
- **3 – Acceptable:** The criterion is partially satisfied; noticeable issues are present but the output remains understandable and usable.
- **2 – Poor:** The criterion is weakly satisfied; major issues substantially reduce quality or reliability.
- **1 – Very Poor:** The criterion is not satisfied; severe issues make the output unreliable, misleading, or difficult to understand.
